That sounds like a good number Roger. I'd go with it. Thanks.

Good morning Andrew and Kathy,

The request specifically asks for public water supplies being treated and population served in the Washington Works area. Since sending my email yesterday, I checked information provided in "Envirofacts" which provides the reported populations for each system. My tally shows that a total of about 74,000 are being served by the ten public water supplies being treated. Unless you believe this number is inaccurate, I will go with it. Thanks again for looking into this issue. Sorry for putting you through any trouble.

Roger

I do not. Does this include both public and private wells?

Hi Roger,

I do not have that number, but probably can get one to you in the next day or so. I included Andrew as he may know.

Kathy

Hi Kathy,

Sorry to bother you, but the question came up concerning the total population served by public water supplies currently being treated for PFOA by Chemours in the Washington Works area. I thought you may have this number readily available. Thanks for your help.

Roger
